Amgen is committed to unlocking the potential of biology for patients suffering from serious illnesses by discovering, developing, manufacturing and delivering innovative human therapeutics. This approach begins by using tools like advanced human genetics to unravel the complexities of disease and understand the fundamentals of human biology.

Amgen - LabCentral | Cambridge, MA

This workshop will provide participants with hands-on training on the new "Colony PCR" lab of the ABE curriculum. Participants will use PCR to confirm the presence of the rfp gene in red colony cells from their lab 5 plates. After completing the workshop, teachers will be eligible to receive support to conduct the lab in their classrooms.
