### Applied probability : models and intuition (Book, 2015 ...

The Economist model assigns Trump 8% probability of winning the election and 1% probability of winning the popular vote. How reliable are those predictions? When I checked model performance on past years, I found that state events assigned 8% tail probability actually occurred in 18%, 16%, and 18% of instances in 2016, 2012, and 2008.
