Algorithmically generated questions are a widely used approach in many online homework systems, but "short-cuts" are possible to "get the answer". Homework problems in the Chem21 approach are grouped into "problem groups" (with 3 - 10 questions in each group) that covers the major topics of each chapter. A student's homework assignment will contain 1 or 2 randomly selected problems from each of the "problem groups".

CHEM 139 Lab Guide Page 1 Experiment 10 Experiment 10 . Absorption Spectroscopy. In the first part of your experiment today, you will observe the H 2 gas emission spectrum. The remainder of your experiment will be carried out using an instrument called a Spectronic-20 (or Spec-20, for short).

Experiment 10 Absorption Spectroscopy

You will learn chemical tests that will allow you to distinguish one functional group from another. You will use the chemical tests to identify the functionality of an unknown organic compound. In addition, you will use a water solubility test to determine whether your organic compound is of high or low formula weight.
