a great endorsement for a technology. Having an author with no affiliation to the producers of the technology is even better.

The RAP book finally arrived - EclipseSource

Tool Support. Many of the Eclipse tools designed for Java or SWT development can be used with RAP. You can use the full power of the Java Development Tools (JDT) including automated refactorings, debugger, test runner etc. The Plug-in Development Environment (PDE) assists with the creation of OSGi bundles, dependency management, maintaining a target platform, etc.

Remote Application Platform (RAP)

If you're interested in single-sourcing Eclipse-based applications, please give it a try. In the 1.3 M5 release, the RAP team added more SWT API to make single sourcing existing applications easier:
