In science energy is the ability to do work. There are many kinds of energy. These include chemical energy, mechanical energy, thermal energy, and electrical energy. Energy is being used or created everywhere in nature. Heat given off from the Sun warms Earth. The wind cools us down. Lightning is a form of energy, too. It is natural electricity.

All About Electricity - PowerKnowledge Physical Science

Energy is defined in science as the ability to move matter or change matter in some other way. Energy can also be defined as the ability to do work. The SI unit for energy as well as work is the joule (J), or Newton • meter (N • m). Energy exists in different forms, such as mechanical energy and chemical energy.
