Work Commitment

The findings reveal substantial and statistically significant effects of marital status on work effort and wage rates, even after we take account of unobserved heterogeneity. The marriage-induced gains in hours worked are highest upon entering marriage, and marriage-induced increases in wage rates emerge as men remain married. Together,

How Do Marital Status, Work Effort, And Wage Rates Interact?

Marriage affects the labor supply of men and women. Changes in work effort, in turn, influence each partner's accumulation of human capital and wage rates. For those who increase their human capital, higher wages over time makes work more attractive, though the
