1D Tolerance Stackup. The simplest form of tolerance analysis is the single direction, 1D Tolerance Stackup. A 1D Tolerance Stackup is created by creating a cross section of a model and adding the tolerance values for each feature in a straight line. The variation in each contributes to the overall

Tolerance Stack up is the permutation of inadequacy (or, flaws) of an assembly part design which directly affects the manufacturability of a part. Knowing the complications involved in assembling a part, tolerance stackup analysis anticipates the impact on total tolerance of a part based on assembly challenges and (preliminary) fluctuating tolerance
