Cell Biology MCQ on Meiosis + Answer Key | Easy Biology Class Cell division normally occurs during the mitotic phase of the cell cycle. During interphase, processes that prepare for cell division

Cell Division Packet Answers

Since meiosis II began with two cells, and each of those cells were split into two cells, we now have 4 unique haploid cells at the end of meiosis. These cells are gametes. Two gametes, one from the father and one from the mother, may fuse to produce a diploid embryo. The resulting embryo then grows through many cycles of mitosis.
