A student uses a toy car and ramp to investigate how surface affects the speed of a rolling object. What should the student intentionally change when doing ...

Benchmark 5th Grade Physical Science Force and Motion Test

Practice questions on motion Question 12 Two cars A and B race each other. The Car A ran for 2 minute at a speed of 7.5 km/h, slept for 56 minute and again ran for 2 minute at a speed of 7.5 km/h. find the average speed of the car A in the race. Answer

Numerical Questions and answers on Motion for Class 9 physics

Rolling Motion and the Moment of Inertia • Due to its inertia, an object at rest or moving in a straight line resists changes to that motion. A similar relationship occurs with rotational motion. • Each object has a moment of inertia, I , which determines how easy or hard it is to change its rotation. An object with a large moment of inertia
