In his 1987, book entitled "Library Machines", Nelson defined hypertext as "non-sequential writing with reader-controlled links". In 2000, Tim Berners-Lee published a statement, acknowledging the influence of hypertext, the work of Engelbart and Bush's "As We May Think" on the development of the World Wide Web.

### Memex - Wikipedia

our original, "Can machines think?" 2. Critique of the New Problem As well as asking, "What is the answer to this new form of the question," one may ask, "Is this new question a worthy one to investigate?" This latter question we investigate without further ado, thereby cutting short an infinite regress.

### COMPUTING MACHINERY AND INTELLIGENCE

All the machines of modern life require energy to make them run. About 90 percent of that energy comes from burning fossil fuels. Fossil fuels include petroleum (oil), coal, and natural gas. These materials are called fossil fuels because, like fossils, they are the remains of organisms that lived long ago. Organisms are plants, animals, and other living things.
